

ABOUT US

At Sobriety Solutions, LLC, our mission is to provide innovative, flexible, and effective solutions for individuals navigating court-ordered sobriety, driving safety, and behavior modification programs. We are committed to supporting our clients through confidential, HIPAA-compliant services such as alcohol monitoring with BACtrack and alcohol education courses. Our goal is to empower individuals to make positive, lasting changes while helping ease the burden on traditional programs like 24/7. We believe in offering accountability with dignity, providing convenient, remote options for those in rural areas or with demanding schedules. Through a client-centered approach, we strive to be a trusted partner for legal professionals and the courts while ensuring our clients meet their obligations and continue their personal and professional growth.

SMARTPHONE BREATHALYZER

BACtrack® | VIEW

The award-winning BACtrack Mobile integrates a smartphone app and professional-grade breathalyzer to bring blood alcohol content (BAC) wirelessly to your case manager. Each monitored user receives a free BACtrack Mobile smartphone breathalyzer to use while they are on the service. This award-winning alcohol tester not only looks great, but also features a professional-grade fuel cell sensor that delivers reliable and accurate BAC results, every time you test. The user keeps the unit when services are completed for self accountability.

BACtrack® | VIEW

ALCOHOL MONITORING

The primary service provided by Sobriety Solutions is the BACtrack alcohol monitoring program. BACtrack can be utilized for any of following purposes:

- DUI Pretrial
- Alternative to the 24/7 Program
- Addiction Recovery
- Compliance Monitoring
- Rehab/Addiction Management
- Family Law & Child Custody
- Workplace Compliance
- Personal Accountability
- Fleet Management

HOW IT WORKS

- BACtrack View is an app-based remote alcohol monitoring service that helps you rebuild trust and accountability whether court ordered or self subscribed.
- Each monitored user receives a free BACtrack Mobile smartphone breathalyzer to use while they are under contract.
- If court ordered, our team will report your progress to the court according to the orders given, taking the worry out of the process.
- BACtrack alcohol monitoring is an outstanding alternative to twice a day in person testing or the alcohol ankle monitor that can be required by the court. It takes away the burden of in person testing allowing the user to keep their daily routine intact while discreetly testing at required times.
